Prior Funding History / Additional Information:

Village Safe Water Projects with federal funding has received prior appropriations of 31,396.3 in FY 98, 31,881.2 in FY 99, 37,742.5 in FY 00, 49,669.7 in FY 01 and 51,303.9 in FY 02.

Village Safe Water Projects

FY2003 Request: \$64,811,700
Reference No: 33822

The Village Safe Water program provides technical and financial support to Alaska's smallest communities to design and construct water, wastewater and solid waste facilities. Each year, grant funds are made available to the state through the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Agriculture-Rural Development (USDA-RD) program. Those funds require the state to appropriate matching funds. Communities apply each year to the state for grants for sanitation projects. Applications are scored weighing primarily the extent to which proposed projects address critical public health needs, as well as the communities' capacity to operate and maintain the facilities. Grants are awarded for the highest ranking projects. Village Safe Water program engineers work directly with community officials to make sure that planning results in facilities that are appropriate for each community, that facilities are properly and efficiently constructed, and that state and federal grant funds are used appropriately.

This appropriation funds grants to communities for designing and constructing water, sewerage and solid waste facilities. The appropriation is funded with a combination of EPA and USDA-RD federal grant funds and state matching funds at a ratio of three federal grant dollars for each matching state dollar (a 25% state match).

An additional 10,130.6 in federal funds is available in FY 03 over the FY 02 federal funding level. The associated increase in state match is 3,377.2. The total 13,507.8 increase for Village Safe Water projects will provide funding for additional rural sanitation infrastructure projects that would otherwise have to wait.
